

ODEW EMIS-ITC Call – 5/12/2025

Notes provided by Gretchen Martin (ACCESS) and BreAnn Blubaugh (LACA)

FY25 Exiting Student Follow up Collection-Final - Grads were recently added for the Follow up collection. ODEW has identified an issue with students who graduated from District A but are shown on the list for District B. This is happening because the accountability is in District B, even though the student graduated from District A. Primarily, the impacted entities are Stem Schools or Community Schools that roll up to a different district than the Community School. ODEW will be putting in a fix to correct the list, removing these students from the resident district's list and adding them to the list for the appropriate school. Hopefully it will be completed this week.

Q: Can you tell us if the JVSDs will receive updated FLUP-001 files that include the GRAD Follow-Up LEA IRN values? The 2 JVSDs we serve have last updated dates of 2/7/25 - before the GRAD IRNs were populated for districts. Last year the JVSDs did have this information included in their files.

A: If there are updates that would be applicable to JVSDs with the Grads being loaded, that data should already be there. The majority of the students on the JVSDs' lists are students that are CTE accountable. Those students were already there; no student would be added to the original follow-up report based upon being a graduate if they weren't already a CTE concentrator. If/when the home/shared district reports values that show the students' status that could be applicable to the JVSDs, that information will appear in the FLUP-003 Level 2 report.

EMIS Training - EMIS Focused Training on Graduation is taking place this week on Wednesday and Friday. Information is available on ODEW's webpage.
