

Data can be messy and complicated.

Data doesn't have to be complex and messy. With Abre, you get easy to understand dashboards and a partner to guide you through how to actual use them to impact student success.

Collection to Centralization

Student success data is gathered in many different places and not readily accessible to all necessary stakeholders.

Data collection and centralization allow leaders to view 3rd party data in one clean and concise location - to then be visualized for analysis.

Analysis to Action

Once data is visualized, it can be synthesized for evaluation. From Early Warning to MTSS, strategic goals are able to achieved with a clear pathway to success.

Data can be messy, but it doesn't have to be.

7 Common Questions

Asked by stakeholders that Abre answers.

Abre is K12's #1 Modern Data Solution. If you spend more than 15 minutes messing with spreadsheets, you'll be amazed by the Abre Platform.

1

Who is at Risk in my School?

You define the variables. We provide the answers. For example, you may define at risk based on behavior, grades, and attendance. Instantly know how your students qualify on a risk scale.

2

Which Positive Behavior Supports Work?

Track positive and negative behaviors in Abre (fully integrated with your SIS). Align behaviors to interventions and track how well they work.

3

Are my Families Engaged?

Do parents interact with communications? Are they fully aware of how their students are doing at school? Are they participants in the school community?

4

Is Student Wellness Impacting Academics?

Run wellness checkins with your students. See how those checkins align to academics.

5

Are Tier 2 and Tier 3 Interventions Working?

Find which students need interventions. Align interventions with those students. Then monitor the effectiveness over time.

6
