

Minimum Server Specs Onmedia Spot

Processor

4 Cores @ 2 GHz or greater

Memory

4 GB (recommend 1-2 GB per core)

Storage

300GB Raid 1 or 5

Current estimates are 60 MB per minute of HD video (We store 4 copies of the video at different resolutions and file types for streaming purposes)

Network

1GB NIC

*We do have schools running it on less depending on the extent you will use the product. OMS will also work in a virtual setting.

Has to be on a Windows Server 2008 or later

- Internal User Database

- e-Directory

- Active Directory – does not support “nested” groups

- Open Directory – does not support “nested” groups
