PREPARE EVERY STAFF MEMBER WITH **PHISHING SIMULATIONS AND TRAINING**

Choose from our library of

3,000+

templates updated weekly to build
your own phishing campaigns or
run simulations automatically.

400+

Training Modules Available

Build Cybersecurity into Your Culture

Simulate Phishing Attacks

Prepare your staff for the most challenging threats they face by simulating the same domain spoofing, typosquatting, and attack techniques scammers find most effective.

Customize Phishing Templates

Every aspect of the phishing simulator and training is customizable, giving you the ability to tailor the training to your organization's greatest threats.

Report Phishing Emails

Turn your staff into active members of your cybersecurity defense with the PhishNotify email reporting plugin.

Simulated Phishing Attack Types

- ✓ Business email compromise (BEC)
- ✓ Data entry
- ✓ Drive-by
- ✓ Malware and malicious attachments
- ✓ Social engineering
- ✓ Spearphishing

TECHGUARD

BUILD A SECURITY AWARENESS PROGRAM THAT WORKS FOR YOU

Track Results Easier than Ever

Browse the library of reporting dashboards and surface your most impactful data in seconds.

Deliver personalized dashboards filtered by learner group, department and more, to get the right data to the right people, automatically.

Automate Your Security Awareness Training

- ✓ Integrate your endpoint protection to deliver training the moment it blocks a security event.
- ✓ Provision staff using one of our automated solutions and dynamically assign staff members to groups for personalized education.
- ✓ Respond to staff-reported emails faster with PhishHunter threat analysis.
- ✓ Connect with your identity provider to authenticate staff members via SSO or deliver a universal training link.
- ✓ Build your own custom integrations using our open API.

Measure Your Cybersecurity Culture

Your cybersecurity culture is one of the greatest reflections of your security practices and a top predictor of staff behaviors. TechGuard makes it easy to measure staff attitudes and perceptions towards cybersecurity and security training efforts.

This allows you to go beyond traditional success metrics like phishing click rate, giving you a new way to quantify success, identify weaknesses, and build strategies for improvement.

TechGuard licensing through FY2028 is provided **to all of your staff members at no cost to you** through a collaborative effort between the Governor's Office, the Ohio Department of Education and Workforce, the Management Council, and your ITC.
